

IMPORTANT

IMPORTANT: This new clutch set is designed to work with the factory Original Equipment Manufacture (O.E.M) release bearing and slave cylinder. Previously Centerforce, as well as other aftermarket clutch sets, may have required a spacer to be added to the release bearing and/or slave cylinder assembly. These aftermarket spacers may have been a flat plate placed between the slave cylinder and transmission OR an extended collar placed between the bearing and the slave cylinder. Please check your release system, if applicable, **REMOVE any spacer that may be present.**

Should you have questions or if you need further information, please call our technical service department at (928) 771-8422 or email us at info@centerforce.com.
